

## PRESS RELEASE

### Honeywell joins eFuel Alliance

**Berlin, 23 October 2024:** Honeywell, a global integrated operating company helping organizations solve the world's toughest, most complex challenges, has joined the eFuel Alliance. Becoming a member of the Alliance is part of Honeywell's approach to increase strategic collaboration with the renewable fuels value chain.

"Honeywell is very happy to be part of the eFuels Alliance now. We are looking forward to promoting the scale up of renewable fuels in the EU together with eFuels Alliance and its other Members. eFuels are needed to help the EU achieving its ambitious climate goals in an innovative and cost-effective way", says Torsten Kuepper, Vice President Government Affairs Europe at Honeywell.

Honeywell's business strategy is closely aligned with global megatrends including the energy transition, the future of aviation, and automation. By taking a multifaceted approach—ranging from investments in hydrogen technologies to the production of renewable and sustainable aviation fuels and solutions for the industrial, chemical and building sectors—Honeywell plays a pivotal role across many areas represented by the eFuel Alliance's member companies.

"Honeywell is well-positioned to provide critical support to our member companies and accelerate the global scale-up of renewable fuels. With its strong presence around the world, the company offers valuable insights that can be applied to the European market, fostering local growth. This membership is a significant boost to our efforts," added Diemer.

#### >>>The eFuel Alliance e.V.<<<

The eFuel Alliance is an interest group committed to promoting political and social acceptance of eFuels and to securing their regulatory approval. We represent more than 170 companies, associations and consumer organizations along the eFuel production value chain. We stand for fair competition and equal competitive condition for all relevant emission reduction solutions. We are firmly committed to further climate change mitigation and seek recognition for the significant part eFuels can play in sustainability and climate protection. Our aim is to create the conditions for the industrial production and widespread use of CO<sub>2</sub>-neutral fuels from renewable sources of energy.
